How to Save on Credit Card Processing

United Synagogue has joined with Premier Merchant Processing to present your congregation with an opportunity to save money on your synagogue's credit card processing and reduce your synagogue's United Synagogue dues at the same time. Here's how it works:

- ★ **If your synagogue partners with Premier, 20 percent of the profit from your synagogue's processing fees will automatically be applied toward next year's United Synagogue annual dues.** This 20 percent will continue to go toward your United Synagogue dues for as long as your synagogue continues its partnership with Premier.
- ★ **Premier saves 98 percent of businesses between 15 and 30 percent on their processing fees.** Premier guarantees that your synagogue will not pay any more than it is paying now for this service. In fact, it is likely you will pay less.
- ★ **Premier offers a virtual terminal that allows your synagogue to process a wide variety of credit card transactions easily.** You can schedule automatic payments from congregants with terms you set. Whether it is a monthly, bimonthly, quarterly, biannual, or annual payment plan, you can set the payment terms and let the automated system work its magic.
- ★ **Premier offers your synagogue the ability to accept checks with guaranteed deposit.** Funds are deposited automatically. You no longer have to bring checks to the bank.
